PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience designing, building, and deploying full-stack applications and developing practical cloud architecture skills on AWS. Built an inventory management platform using Next.js, Redux Toolkit, Node.js, Express, Prisma, PostgreSQL, and AWS services including EC2, RDS, S3, VPC, Cognito, API Gateway, and Amplify, with GitHub Actions CI/CD. Strong foundation in Python, JavaScript/TypeScript, APIs, databases, authentication, networking, security, and application development. Active technical leader in AWS Learning Club – UE Caloocan, AWS User Group Philippines, and AWS Community Day Philippines. Interested in Solutions Architecture, cloud computing, scalable systems, security, and customer-focused technical problem solving.

CLOUD & TECHNICAL SKILLS

- AWS: EC2, RDS, S3, VPC, Cognito, API Gateway, Amplify; cloud application deployment and architecture
- Programming: Python, C++, JavaScript (ES6+), TypeScript, PHP
- Web & Backend: Next.js, React.js, Node.js, Express.js, Flask, Django, REST APIs, WebSocket
- Databases: PostgreSQL, MySQL, Prisma, Supabase, Firebase, SQL; relational database concepts
- DevOps & Automation: Git, GitHub, GitHub Actions, CI/CD, Vercel, Postman, n8n
- Security & Systems: Authentication, role-based access control, networking fundamentals, VPC concepts, client-server architecture
- AI-Assisted Development: Cursor, Kiro, n8n

AWS CLOUD PROJECT

AWS Inventory Management Platform | Full-Stack Cloud Application | Aug 2026 – Present

- Built and deployed a full-stack inventory management dashboard using Next.js, Redux Toolkit, Node.js, Express, Prisma, and PostgreSQL on AWS.
- Provisioned Amazon EC2 for API hosting, Amazon RDS for managed PostgreSQL, and Amazon S3 for image storage within a custom VPC.
- Implemented Amazon Cognito authentication with role-based access control and exposed backend services through Amazon API Gateway.
- Deployed the frontend using AWS Amplify and established CI/CD automation through GitHub Actions.

PROFESSIONAL EXPERIENCE

Web Development Intern | JG Superstore, San Juan City | May 2025 – Jul 2025

- Developed responsive e-commerce features and supported production-ready web application improvements.
- Collaborated with developers to implement features, troubleshoot issues, test changes, and assist with deployment.
- Fixed front-end defects and improved website usability through iterative development and debugging.
- Worked with Git and Agile development practices in a collaborative software engineering environment.

TECHNICAL LEADERSHIP & AWS COMMUNITY

- Executive Secretary / Logistics & Tech Team Lead | AWS Learning Club – UE Caloocan | Jun 2025 – Jun 2026
- Tech Support Co-Lead | AWS User Group Philippines | 2025 – 2026
- Volunteer | AWS Community Day Philippines | 2025 – 2026
- Vice President for External Affairs / Business Manager | Association of Computer Studies Students | Jul 2023 – Jun 2026
- Associate Game Developer Lead | Google Developer Student Clubs | 2024 – 2026
- Secretary | DevCon University of the East Chapter | 2025 – 2026
- Team Lead – Code of Conduct & Security | Python Asia 2026 (PyCon APAC) | Mar 2026

ADDITIONAL TECHNICAL PROJECTS

PHOTON – Image-to-Code Execution Platform | Thesis Project

- Developed an image-to-code platform using Google Vision OCR to extract source code from images and execute it in an interactive environment.
- Implemented frontend-backend communication and real-time code execution using React.js, Flask, and WebSocket.

Stock Market Analytics Platform

- Built a real-time stock market dashboard using Next.js, React, TypeScript, Inngest, authentication, and financial APIs.
- Implemented asynchronous background jobs and reusable application components for a data-driven web application.

M.A.G.E. Digital Guild Platform

- Developed a full-stack platform using Next.js, TypeScript, Supabase, PostgreSQL, and Tailwind CSS with authentication, admin CMS, event management, social features, and a mini-game hub.
- Built responsive dashboards and reusable components and deployed the application using Vercel.

EDUCATION

Bachelor of Science in Computer Science | University of the East – Caloocan | Graduated 2026

CERTIFICATIONS

- Front-End Engineering with React — CodeSignal
- React Basics — Meta
- Programming with JavaScript — Meta
- HTML and CSS in Depth — Meta
- Introduction to Front-End Development — Meta
- Version Control (Git & GitHub) — Meta
- Implementing MVC ToDo App with Flask — CodeSignal
- Mastering Algorithms & Data Structures in Python — CodeSignal

ADDITIONAL INFORMATION

- Languages: English and Tagalog — written and verbal communication
- Eligible to work in the Philippines
- Fresh graduate; available for full-time employment
